| ARTICLE INFO | ABSTRACT |
|--------------|--|
| | The main objectives of the study are to find out the major problems faced by the |
| | investors of Sukanya Samriddhi Account Scheme and to check the relationship |
| | between demographic variables and investment problems. A sample of 75 |
| | investors of SSA scheme from Rohtak city is selected. Mean, S.D., Ranking, and |
| | ANOVA techniques are used for analysis. The major problems are; the premature |
| | facility is not allowed, the loan facility is not available against the investment, |
| | and the long lock-in period. The Government of India should take certain measures to resolve these problems, so that more parents invest in this scheme. |

| | Problems, Girl Child. |

Introduction

Women have historically always enjoyed a position of high esteem in ancient India. An ideal woman was expected to be courageous and dignified, but she was bound to the duty of mother and wife, nurturing her children and caring for her family without any contribution to economic development (Bhattacharya and Gandhi, 2020). The treatment of women is the best indicator of a country's growth. Women have experienced difficulties for generations, which has given them unbounded tolerance and determination and made them stronger in the end. The female labour force participation rate in India rose by 4.7 percentage points in 2023 compared to the previous year. With 32.68 percent, the rate achieved its peak in the observed period. (www.statista.com). At present India, one of the largest economies in the world is still struggling with the challenge of bridging the gender gap in the labour force. The gap between men's and women's labour force participation has widened since 2005, despite the nation's significant progress towards gender equality.

In fact, at 168 out of 187 globally, India has one of the lowest rates of female labour force participation among nations. When women are treated at par with men and are given the same opportunities; it strengthens economies and promotes development. Better development outcomes, such as reduced rates of vulnerable employment and extreme poverty among female employees, are also linked to gender equality. With a score of 74.4 out of 100 on the Women, Business, and Law index for 2022, India ranks among the top achievers in the South Asian area. The average Women, Business, and Law index score for the eight economies in South Asia is 63.7 out of 100. While the WBL index score at the global level is 76.5 out of 100. Women in rural areas are participating in the economy more and more. According to the survey, the rural female labour force participation rate (FLFPR) increased noticeably from 19.7% in 2018-19 to 27.7% in 2020-21(www.pib.gov.in). Various initiatives have been taken by Indian Govt. to provide financial independence to the women of India and strengthen their position. Through assisting self-help organizations, the World Bank is also making investments in the financial empowerment of women and the education of girls. But these measures are ineffective unless girls receive an education and are given knowledge, skills, and attitudes that are marketable. Due to pressure from their families, many women quit their jobs even after attaining the essential skills. Parents of girl children must be encouraged and given financial support to make significant educational investments in their girls from early infancy through maturity. As a result, the Government of India (GOI) developed the Sukanya Samriddhi Yojana (SSY) in 2015. It is a policy that enables parents to make investments for the future of their girl child while also ensuring a secure and high rate of return.

Key Features of the scheme:

- The scheme is specifically framed for the girl child.
- It is a Govt. backed small saving scheme.
- Maximum 2 accounts can be opened per family except in certain circumstances.
- Girl's age must be 10 or less than 10 years.
- Minimum deposit amount is Rs. 250 and the maximum limit is Rs. 1,50,000.
- Deposits are allowed till the completion of 15 years from the opening of the account.
- Lock-in period of this scheme is of 21 years.
- Partial withdrawal is allowed only when a girl pursues higher education or attains the age of 18.

Literature Review

Sale S.M., and Godbole J.A., (2021) have observed that the factors that influence the opening of Sukanya Samriddhi Accounts, as well as respondents' perceptions and satisfaction, have been discovered. There is no substantial difference between gender and a positive attitude towards girl childbirth. Ray M., and Shantanu R., (2020) found that a total of 13 factors were used to assess respondents' awareness. In comparison to Sukanya Samriddhi Account, respondents are more aware of the Public Provident Fund. The majority of investors were aware of the tax advantages of both schemes. Shivani, R. et al (2020) evaluated that the deposit period ranked as the first factor and child education ranked second to influence the investor to open an account under this scheme. The foremost shortcoming of this scheme is that premature withdrawal of the whole amount is not permitted. There is a substantial difference between the gender of the investor and awareness of the SSY account. Unnisa S. (2020) concluded that the majority of the depositor are highly satisfied with the features of this scheme. This is having a higher interest rate than all small saving schemes.

Amount at maturity will make the girl child financially strong. Since this scheme is specifically framed for girl child will help in Improving gender inequality. It is found that customers are preferring Post Offices to banks. Baburaj, D. (2019) said that Sukanya Samriddhi Saving Scheme has the potential to attract more investors due to its higher interest rate. It is a great help to parents of a girl child. Pancholi, K. et al. (2018) found that Parents of Udaipur city had knowledge about the SSY and its benefits. They were concerned about their child's future, so they wanted to invest more in such saving schemes specifically meant for girls' future. Das, M. (2018) SSY is a very interesting investment scheme for salaried persons as well as for higher-income groups. However, the entire potential of SSY will be realized when it reaches out to marginalized individuals and they perceive SSY as a viable investment option.

Objectives of the Study:

- 1. To identify the major problems faced by the investors of Sukanya Samriddhi Account Scheme.
- 2. To study the relationship between demographic variables and investment problems of Sukanya Samriddhi Account Scheme.

Hypothesis of the study:

Ho1: There is no significant relationship between Gender and investment problems of the Sukanya Samriddhi Account Scheme.

Ho2: There is no significant relationship between Educational Qualification and investment problems of Sukanya Samriddhi Account Scheme.

Ho3: There is no significant relationship between place of residence and investment problems of Sukanya Samriddhi Account Scheme.

Ho4: There is no significant relationship between occupation and investment problems of Sukanya Samriddhi Account Scheme.

Ho5: There is no significant relationship between Income and investment problems of Sukanya Samriddhi Account Scheme.

Research Methodology:

This study is descriptive and analytical in nature. A well-structured questionnaire has been used to collect primary data through a google form. A sample of 75 investors of the Sukanya Samriddhi Account Scheme has been chosen from Rohtak city. A justified random sampling technique is used for selecting the sample from the population. Weighted Average Mean, Ranking method and ANOVA has been used to analyze the data.

Data Analysis and Interpretation: Demographic Variables:

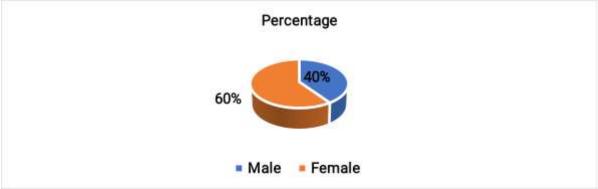

Chart 1: Gender-wise Distribution of Respondents

Chart No. 1 depicts that 60% of respondents are female and 40% of respondents are male.

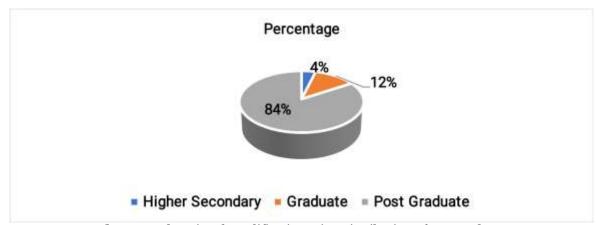

Chart 2: Educational Qualification-wise Distribution of Respondents

The above chart signifies that 84% of respondents have completed post-graduation. 12% of respondents have completed UG and only 4% of respondents are higher secondary.

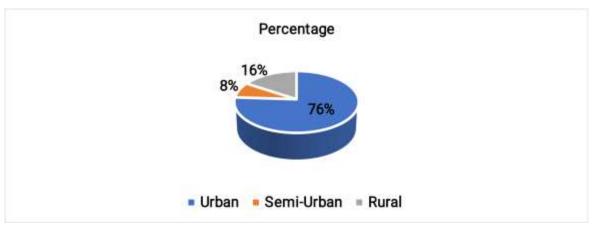

Chart 3: Residential area-wise Distribution of Respondents

Chart no. 3 represents residential area-wise distribution. 76% of respondents are from urban areas and 16% and 8% of respondents are from rural and semi-urban areas.

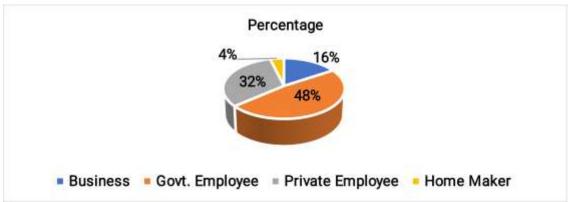

Chart 4: Occupation-wise Distribution of Respondents

Above chart presents the details of occupation wise distribution of respondents. 48% of respondents are govt. employees, 32% are govt. employees, 16% are businessperson and 4% are home makers.

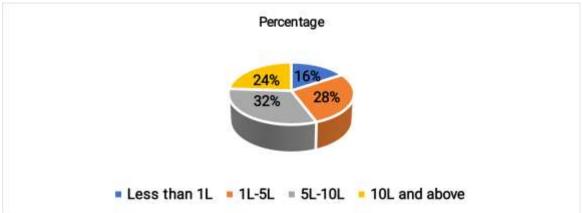

Chart 5: Yearly Income-wise Distribution of Respondents

It is observed from the above chart that 24% of respondents belong to above 10L income group, 32% are from 5L-10L income category, 28% and 16% of respondents come from 1L-5L and less than 1L income class group respectively.

Table No. 1 Major Problems faced by the investors of Sukanya Samriddhi Account Scheme

| Problem Statements/Weights | | | | | | Weighted Average | |
|--|----|----|----|----|----|------------------|------|
| | 5 | 4 | 3 | 2 | 1 | Mean | Rank |
| 1. No Fixed Rate of Interest | 6 | 45 | 3 | 15 | 6 | 17 | IX |
| 2. Long Lock-in Period | 21 | 30 | 18 | 0 | 6 | 19 | III |
| 3. Premature withdrawal is not allowed | 33 | 27 | 3 | 6 | 6 | 20 | I |
| 4. Maximum 2 accounts | 18 | 30 | 15 | 6 | 6 | 18.2 | VIII |
| 5. Age barrier | 18 | 33 | 15 | 3 | 6 | 18.6 | V |
| 6. Lack of liquidity | 18 | 36 | 12 | 0 | 9 | 18.6 | V |
| 7. Limited investment | 12 | 42 | 12 | 3 | 6 | 18.4 | VII |
| 8. Lack of loan facility | 30 | 30 | 0 | 3 | 12 | 19.2 | II |
| 9. Limited Withdrawal facility | 30 | 27 | 0 | 6 | 12 | 18.8 | IV |
| 10. Less Awareness | 6 | 45 | 3 | 15 | 6 | 17 | IX |

Table no. 1 demonstrates the ranks assigned to the problems of the SSA scheme which is given on the basis of the weighted average mean. The most important problem of investment in SSA Scheme is that premature withdrawal is not allowed except in certain circumstances, the second rank is assigned to lack of loan facility since loan facility is not allowed against the deposit of this scheme, the third most important problem of investment in this scheme is that it has a very long lock-in period. The least important problems are 'limited investment' and the 'rate of interest is not fixed'.

Ho1: There is no significant relationship between Gender and investment problems of the Sukanya Samriddhi Account Scheme.

Table No. 2 Relationship between Gender and investment problems of the Sukanya Samriddhi Account Scheme

| 2. Long lock-in period (P2) | Between Groups | 6.722 | / -1 1 | 6 722 | 5 803 | .018 |
| 2. Long took in period (12) | Within Groups | 83.278 | 73 | 1 | 5.095 | .010 |
| | Total | 90.000 | 7 3 | 1.141 | | |
| . Premature withdrawal is not allowed (P3) | Between Groups | 4.500 | 1 | 4.500 | 3.000 | .087 |
| 07 | Within Groups | 109.500 | 73 | 1.500 | | |
| | Total | 114.000 | 74 | | | |
| 4. Maximum 2 accounts (P4) | Between Groups | 4.702 | 1 | 4.702 | 3,554 | .063 |
| | Within Groups | 96.578 | 73 | | 0 00 1 | |
| | Total | 101.280 | 74 | | | |
| 5. Age barrier (P5) | Between Groups | 5.120 | 1 | 5.120 | 4.247 | .043 |
| | Within Groups | 88.000 | 73 | 1.205 | | |
| | Total | 93.120 | 74 | J | | |
| 6. Lack of liquidity (P6) | Between Groups | 19.220 | 1 | 19.220 | 16.334 | .000 |
| | Within Groups | 85.900 | 73 | 1.177 | | |
| | Total | 105.120 | 74 | , , | | |
| 7. Limited investment (P7) | Between Groups | 9.976 | 1 | 6.722 5.497 73 1.223 74 | .002 | |
| | Within Groups | 72.344 | 73 | .991 | | |
| | Total | 82.320 | 74 | | | |
| 8. Lack of loan facility (P8) | Between Groups | .269 | 1 | .269 | .133 | .717 |
| • | Within Groups | 147.811 | 73 | 2.025 | | |
| | Total | 148.080 | 74 | | | |
| 9. Limited Withdrawal facility (P9) | Between Groups | 16.436 | 1 | 16.436 | 8.407 | .005 |
|), <u> </u> | Within Groups | 142.711 | 73 | | | |
| | Total | 159.147 | 74 | | | |
| 10. Less Awareness (P10) | Between Groups | 6.722 | 1 | 6.722 | 5.497 | .022 |
| | Within Groups | 89.278 | 73 | | | |
| | Total | 96.000 | 74 | | | |

By analysing through One way ANOVA, table No. 2 represents those hypotheses of P1, P2, P5, P6, P7, P9, and P10 are rejected since the p-value is less than 0.05 while hypotheses of P3, P4, and P8 are accepted since the p-value is more than 0.05. Hence, 'premature withdrawal is not allowed', 'maximum 2 accounts are allowed', and 'lack of loan facility' has no significant relation with 'Gender'. These problems are not gender specific while others have a strong relationship with gender.

Ho2: There is no significant relationship between Educational Qualification and investment problems of Sukanya Samriddhi Account Scheme.

Table No. 3 Relationship between Educational Qualification and investment problems of Sukanya Samriddhi Account Scheme

| Parameters | | Sum of | | Mean | | |
|--|----------------|---------|------|--------|--------|------|
| | | Squares | d.f. | Square | F | Sig. |
| 1. No Fixed rate of interest (P1) | Between Groups | 2.794 | 2 | 1.397 | 1.079 | .345 |
| | Within Groups | 93.206 | 72 | 1.295 | | |
| | Total | 96.000 | 74 | | | |
| 2. Long lock-in period (P2) | Between Groups | 28.000 | 2 | 14.000 | 16.258 | .000 |
| | Within Groups | 62.000 | 72 | .861 | | |
| | Total | 90.000 | 74 | | | |
| 3. Premature withdrawal is not allowed | Between Groups | 6.349 | 2 | 3.175 | 2.123 | .127 |
| (P ₃) | Within Groups | 107.651 | 72 | 1.495 | | |
| | Total | 114.000 | 74 | | | |
| 4. Maximum 2 accounts (P4) | Between Groups | .963 | 2 | .481 | .345 | .709 |
| | Within Groups | 100.317 | 72 | 1.393 | | |
| | Total | 101.280 | 74 | | | |
| 5. Age barrier (P5) | Between Groups | 1.342 | 2 | .671 | .526 | .593 |

| | Within Groups | 91.778 | 72 | 1.275 | | |
|-------------------------------------|----------------|---------|----|--------|-------|------|
| | Total | 93.120 | 74 | , , | | |
| 6. Lack of liquidity (P6) | Between Groups | 13.691 | 2 | 6.846 | 5.391 | .007 |
| | Within Groups | 91.429 | 72 | 1.270 | | |
| | Total | 105.120 | 74 | | | |
| 7. Limited investment (P7) | Between Groups | 6.606 | 2 | 3.303 | 3.141 | .049 |
| | Within Groups | 75.714 | 72 | 1.052 | | |
| | Total | 82.320 | 74 | | | |
| 8. Lack of loan facility (P8) | Between Groups | 4.810 | 2 | 2.405 | 1.209 | .305 |
| | Within Groups | 143.270 | 72 | 1.990 | | |
| | Total | 148.080 | 74 | | | |
| 9. Limited Withdrawal facility (P9) | Between Groups | 24.543 | 2 | 12.272 | 6.564 | .002 |
| | Within Groups | 134.603 | 72 | 1.869 | | |
| | Total | 159.147 | 74 | | | |
| 10. Less Awareness (P10) | Between Groups | 2.794 | 2 | 1.397 | 1.079 | .345 |
| | Within Groups | 93.206 | 72 | 1.295 | | |
| | Total | 96.000 | 74 | | | |

Table No. 3 signifies those hypotheses of P1, P2, P3, P6, P7, P8, P9, P10 are rejected since P value is less than 0.05 while hypotheses of P4, P5 are accepted since P value is more than 0.05. Here 'maximum 2 accounts are allowed' and 'age barrier' have no imperative relationship with 'Educational Qualification' while other problems have important relationship with educational qualification.

Ho3: There is no significant relationship between place of residence and investment problems of Sukanya Samriddhi Account Scheme.

Table No. 4 Relationship between place of residence and investment problems of Sukanya Samriddhi Account Scheme

| | | Sum | of | Mean | | |
|---|----------------|---------|------|--------|-------|------|
| Parameters | | Squares | d.f. | Square | F | Sig. |
| 1. No Fixed rate of interest (P1) | Between Groups | 4.075 | 2 | 2.037 | 1.596 | .210 |
| | Within Groups | 91.925 | 72 | 1.277 | | |
| | Total | 96.000 | 74 | | | |
| 2. Long lock-in period (P2) | Between Groups | 4.026 | 2 | 2.013 | 1.686 | .192 |
| | Within Groups | 85.974 | 72 | 1.194 | | |
| | Total | 90.000 | 74 | | | |
| 3. Premature withdrawal is not | Between Groups | 7.456 | 2 | 3.728 | 2.519 | .088 |
| allowed (P3) | Within Groups | 106.544 | 72 | 1.480 | | |
| | Total | 114.000 | 74 | | | |
| 4. Maximum 2 accounts (P4) | Between Groups | 10.078 | 2 | 5.039 | 3.978 | .023 |
| | Within Groups | 91.202 | 72 | 1.267 | | |
| | Total | 101.280 | 74 | | | |
| 5. Age barrier (P5) | Between Groups | 3.734 | 2 | 1.867 | 1.504 | .229 |
| | Within Groups | 89.386 | 72 | 1.241 | | |
| | Total | 93.120 | 74 | | | |
| . Lack of liquidity (P6) | Between Groups | 10.975 | 2 | 5.488 | 4.197 | .019 |
| | Within Groups | 94.145 | 72 | 1.308 | | |
| | Total | 105.120 | 74 | | | |
| 7. Limited investment (P7) | Between Groups | .671 | 2 | .335 | .296 | .745 |
| | Within Groups | 81.649 | 72 | 1.134 | | |
| | Total | 82.320 | 74 | | | |
| 8. Lack of loan facility (P8) | Between Groups | 4.984 | 2 | 2.492 | 1.254 | .292 |
| | Within Groups | 143.096 | 72 | 1.987 | | |
| | Total | 148.080 | 74 | | | |
| Limited Withdrawal facility | Between Groups | 3.467 | 2 | 1.733 | .802 | .453 |
| (P9) | Within Groups | 155.680 | 72 | 2.162 | | |
| | Total | 159.147 | 74 | | | |
| 10. Less Awareness (P10) | Between Groups | 4.075 | 2 | 2.037 | 1.596 | .210 |
| | Within Groups | 91.925 | 72 | 1.277 | | |
| | Total | 96.000 | 74 | | | |

Table No. 4 reveals that hypotheses related to P1, P2, P4, P5, P6, P8, P9, P10 are rejected due to low value of p which is less than 0.05 and hypotheses of P3, P7 are accepted due to high value of p which is less than 0.05 in these cases. That means 'premature withdrawal is not allowed' and 'limited investment' have not any noteworthy association with 'Place of Residence' whether it is urban, semi-urban or rural.

Ho4: There is no significant relationship between occupation and investment problems of Sukanya Samriddhi Account Scheme.

Table No. 5 Relationship between occupation and investment problems of Sukanya Samriddhi Account

| Parameters | | Sum of Squares | d.f. | Mean Square | F | Sig. |
|---|----------------|----------------|------|-------------|-------|------|
| No Fixed rate of interest (P1) | Between Groups | 2.492 | 4 | .623 | .466 | .760 |
| | Within Groups | 93.508 | 70 | 1.336 | | |
| | Total | 96.000 | 74 | | | |
| 2. Long lock-in period (P2) | Between Groups | 12.315 | 4 | 3.079 | 2.774 | .034 |
| | Within Groups | 77.685 | 70 | 1.110 | | |
| | Total | 90.000 | 74 | | | |
| 3. Premature withdrawal is not allowed (P3) | Between Groups | 7.535 | 4 | 1.884 | 1.239 | .303 |
| | Within Groups | 106.465 | 70 | 1.521 | | |
| | Total | 114.000 | 74 | | | |
| 4. Maximum 2 accounts (P4) | Between Groups | 20.235 | 4 | 5.059 | 4.369 | .003 |
| | Within Groups | 81.045 | 70 | 1.158 | | |
| | Total | 101.280 | 74 | | | |
| 5. Age barrier (P5) | Between Groups | 6.836 | 4 | 1.709 | 1.387 | .248 |
| | Within Groups | 86.284 | 70 | 1.233 | | |
| | Total | 93.120 | 74 | | | |
| 6. Lack of liquidity (P6) | Between Groups | 2.014 | 4 | .503 | .342 | .849 |
| | Within Groups | 103.106 | 70 | 1.473 | | |
| | Total | 105.120 | 74 | | | |
| 7. Limited investment (P7) | Between Groups | .913 | 4 | .228 | .196 | .940 |
| | Within Groups | 81.407 | 70 | 1.163 | | |
| | Total | 82.320 | 74 | | | |
| 3. Lack of loan facility (P8) | Between Groups | 25.837 | 4 | 6.459 | 3.699 | .009 |
| | Within Groups | 122.243 | 70 | 1.746 | | |
| | Total | 148.080 | 74 | | | |
|). Limited Withdrawal facility (P9) | Between Groups | 21.712 | 4 | 5.428 | 2.765 | .034 |
| | Within Groups | 137.435 | 70 | 1.963 | | |
| | Total | 159.147 | 74 | | | |
| o. Less Awareness (P10) | Between Groups | 2.492 | 4 | .623 | .466 | .760 |
| | Within Groups | 93.508 | 70 | 1.336 | | |
| | Total | 96.000 | 74 | | | |

Table No. 5 shows that on the one hand P2, P3, P4, P5, P8, P9 do not have any significant association with occupation since their p-value is low, on the other hand P1, P6, P7, P10 have a significant association with occupation since their p-value is greater than 0.05. It means the significance of problem depends upon the type of occupation an investor has. 'No Fixed rate of interest, 'Lack of liquidity, 'Limited Investment', 'Less Awareness' are the problems have a dependency on occupation.

Ho5: There is no significant relationship between Income and investment problems of Sukanya Samriddhi Account Scheme.

Table No. 6 discloses that null hypotheses regarding P3, P4, P6, P7, P8, and P9 have to go since the p-value is low it is less than 0.05 and null hypotheses regarding P1, P2, P5, and P10 are accepted since the p-value is more than 0.05. 'No Fixed rate of interest', 'Long lock-in period', 'Age barrier', and 'Less Awareness' these problems do not have any connection with the income of the investors. Whether they belong to a high-income group or a low-income group it doesn't have any effect on their opinions about the problem.

Conclusion & Recommendation:

It is found from the above study that the 'Minimum deposit limit' is very low; which is affordable for poor people too but its 'lock-in period' is very long and in case of need for fund 'premature withdrawal' is not allowed and like PPF 'loan facility' is not available in this scheme which is a setback for this scheme. After testing the hypotheses, it is found that most of the problems are directly related to demographic variables, these are specific to gender (P1, P2, P5, P6, P7, P9, P10), occupation (P1, P6, P7, P10), yearly income (P3, P4, P6, P7, P8, P9), educational qualification (P1, P2, P3, P6, P7, P8, P9, P10), and place of residence (P1, P2, P4, P5, P6, P8, P9, P10). Some of the problems are not specific to gender (P3, P4, P8), occupation (P2, P3, P4, P5, P8, P10), yearly income (P1, P2, P5, P10), educational qualification (P4, P5), and place of residence (P3, P7). Hence, it is concluded that some shortcomings of the Sukanya Samriddhi Account scheme cannot be ignored at all, since these are affecting the potential investment too. Potential investors also take the opinion of present investors before investing their funds in any investment avenues. Further, it is recommended that Government should reconsider the rules and provisions of this scheme so that present as well as potential investors get benefited from this scheme which is aimed to make the girl child financially independent. This study can also assist policymakers in making the required adjustments to satisfy investors' ambitions.
